SUMMARY

Full-Stack Developer specializing in React, Next.js, Node.js, and MongoDB. Built real-time applications using WebRTC and Socket.io and won 1st place at LNMIIT Hackathon. Passionate about scalable web applications and problem solving.

EDUCATION

Bachelor of Technology in Computer Science
Jabalpur Engineering College
📅 September 2024 - May 2028

7.5
Jabalpur

PROJECTS

VidChat
React,Node.js , MongoDB , TailwindCSS , WebRTC , Socket.io,
• Built a WebRTC-based video chat platform supporting 1-to-1 low-latency communication with sub-500ms connection setup.
• Implemented user-matching logic for one-to-one video sessions
• Integrated real-time audio and video communication using WebRTC
• Built signaling and session management using WebSockets
• Implemented basic moderation controls and session lifecycle handling
• Optimized for low-latency communication and stable connections

Live
Jaipur

Live

MacOS Portfolio
React,Node.js , MongoDB , TailwindCSS , Zustand ,
• Designed and developed a macOS-inspired personal portfolio with a desktop-like, window-based user interface
• Integrated a Siri-like voice assistant using speech recognition and text-to-speech
• Implemented smooth animations, window controls, and modular component architecture
• Built a custom Unix-like shell supporting built-in commands and PATH-based command execution
• Optimized performance, responsiveness, and overall UI/UX
• Deployed the application and maintained version control using GitHub

SKILLS

Languages: C++, JavaScript, TypeScript
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Redux
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Database: MongoDB, Firebase
Tools & Platforms: Git, GitHub, Postman, Docker, Linux, AWS, Socket.io, WebRTC, Zustand
Core CS: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

AWARDS & ACHIEVEMENT

1st Place, Hackathon organized by The LNM Institute of Information Technology

CODING PROFILES

- **LeetCode:** Solved 300+ DSA problems
- **GitHub:** 5+ repositories featuring React, Node.js, MongoDB, and WebRTC projects
- **Portfolio:** Interactive macOS-inspired developer portfolio
